NextBASIC Unimplemented Features (Updated 19 Aug 2018)

This document lists the as-yet-unimplemented features of NextZXOS/NextBASIC, as at the current version of NextZXOS (**v1.99I**). If possible, these will be provided with the v2.00 version at https://www.specnext.com/latest-distro/ by the time the cased machines are release, although some may not be ready until post-release (v2.01+).

This should be read in conjunction with the other documents:
     NextBASIC file-related commands and features
     NextBASIC new commands and features
     NextZXOS Editor features
     NextZXOS API

Unimplemented NextZXOS features

Spanish language version of the ROMs is not yet available.

CP/M loader option is not yet fully implemented.

Unimplemented NMI Menu (Multiface replacement) features

Debug tools: Disassemble & single-step
